More dark grey glass platters are available on page 173.

“Fingerfood-Tree”

Wildly bent tree branches supported by a base made of polished stainless steel: The finger-food-trees by Zieher are absolutely delightful due to their extraordinary look and variable uses achieved by the different attachments!

A number of suitable attachments and applications offer a lot of possibilities and form the basis for the chef`s imagination. The fingerfood-trees are perfect for patisserie creations, savory snacks in the form of mini-wraps or skewers, fruit with chocolate icing or just for jam at breakfast buffets. Furthermore they can be placed on both buffets and bar tables with the solid base ensuring stability.

This extraordinary way of presenting fingerfood will surprise and fascinate your guests and will definitely leave a lasting impression.

The fingerfood-trees are furnished with 30 branches, which in turn can be fitted with 5 suitable attachments (page 98). Besides a clip that holds wooden skewers and a spiral for small wraps and waffles, we offer rings in three sizes, the medium size of which is especially designed for holding small jam jars (e.g. Bonne Maman).

Velcro straps to fasten the branches and a stout carrier bag are available from the accessory section and allow easy transport and space-saving storage of the bent trees.

Design: Jochen Gromann

Equipped with rings size M the fingerfood-tree is perfectly suitable for presenting portion jam, e. g. Bonne Maman.

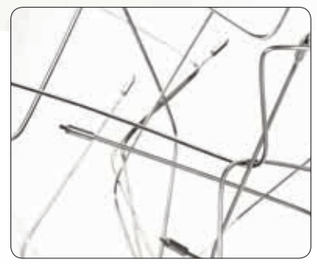
"Fingerfood-Tree"

Please note:

The trees are being delivered with unbent branches; the bending has to be arranged before the first use!

The branches are made of stainless steel and will sag when loaded with food. This is why the branches should not be bent too far down when empty. In order to obtain a more favourable result, it is recommended to bend the branches one by one and to work in a circle from the outside to the inside.

The different attachments can be screwed onto the end of the branches, whereas the connection point should only be tightened up slightly. When using the rings or spiral, it is recommended to leave the connection point open by about half a turn, because they will turn into the apt position by themselves due to the weight of the attachments.



Increased stability through larger base plate.

transport bag
polyester, black, with zip and 2 carrying straps, for fingerfood-tree item 8018.01

item	l x w x h in cm
